

Episode 05 - Let's get Hooked!

Theory

- What is the difference between **Named** Export, **Default** export and *** as** export?
- What is the importance of config.js file
- What are React Hooks?
- Why do we need a **useState** Hook?

Coding

- Clean up your code
- Create a Folder Structure for your app
- Make different files for each Components
- Create a config file
- Use all types of import and export
- Create a Search Box in your App
- Use useState to create a variable and bind it to the input box
- Try to make your search bar work
